

# DGT 5810-12

## Universal Workstation

### Convenient operation

### Noiseless work (0 dB)

### One station, two integrated screens

### Flexible arrangement of the workplace and device:

- standing
- on a desk-mounted rack
- hung on the wall

### Flexible configuration of equipment and implemented functionalities

The DGT 5810-12 Workstation is a ready-made kit for organizing any workplace, that requires a reliable interface to conduct tasks in an interactive way. The set is a professional, efficient and noiseless all-in-one computer with an integrated additional monitor. Both monitors have the same dimensions and external appearance, which increases the Workstation esthetics. The station is operated via a keyboard and a mouse, however, at the user's request, both monitors can be touch screens. The station can stand on a desk, it can be placed on a rack or hung on the wall. DGT 5810-12 is equipped with a built-in, mechanically retractable camera and can be additionally equipped with a DVD player.

The station is used as an **extended Command Support System** position for all types of services, as well as ideal equipment for the **office workstations**.

The DGT 5810-12 station is intended for **continuous operation**. No rotating elements guarantees comfortable operation (**noise level 0 dB**). The used displays, with the highest quality and very good performance parameters, allow you to work both in a very well-lit rooms and at night, when lighting is limited.
